

ID	Field	Indicator metadata
0	Fund relevance	ERDF JTF
1	Indicator code	RCR102
2	Indicator name	Research jobs created in supported entities
2b	Indicator code and short name (open data name)	RCR102 RTDI: New researchers
3	Measurement unit	annual FTEs
4	Type of indicator	result
5	Baseline	0
6	Milestone 2024	not required
7	Target 2029	>0
8	Policy objective	Use in all policy objectives, whenever relevant and under JTF
9	Specific objective	Use in all specific objectives, whenever relevant and under JTF
10	Definition and concepts	<p>Number of research jobs created as a result of the support. The indicator is measured in terms of average annual full time equivalents (FTEs) calculated according to the methodology provided in the OECD Frascati Manual 2015. Vacant R&D positions are not counted, neither is support staff for R&D (i.e. posts not directly involved in R&D activities).</p> <p>Annual FTE of R&D personnel is defined as the ratio of working hours actually spent on R&D during a calendar year divided by the total number of hours conventionally worked in the same period by an individual or a group. By convention a person cannot perform more than one FTE on R&D on an annual basis. The number of hours conventionally worked is determined on the basis of normative/ statutory working hours.</p> <p>A full time person will be identified with reference to their employment status, the type of contract (full time or part time) and their level of engagement in R&D (see OECD in reference, Chapter 5.3).</p>
11	Data collection	Supported projects
12	Time measurement achieved	For existing research facilities, upon completion of output of the supported project. For research facilities newly built, one year after completion of the research facility at the latest.
13	Aggregation issues	
14	Reporting	<p>Rule 1: Reporting by specific objective</p> <p>Forecast for selected projects and achieved values, both cumulative to date (CPR Annex VII, Table 3).</p>
